

CONSTRUCTION NOTICE

Coming soon! Construction for the City of Shelton's Western Gateway Project is anticipated to start Spring 2022. This project will revitalize West Railroad Avenue, a main entry into our beautiful town, from the City Limit/Pacific Ct. to just past the 8th Street intersection.

Prior to construction, City crews will be removing the railroad tracks that crosses near the 11th Street intersection.

Construction of the estimated \$2,600,000 project, funded in part by the *Transportation Improvement Board* and the *American Rescue Plan Act*, will include new pavement, storm drain improvements, new water main and water services, new curb, gutter, and sidewalks, and a new bus pullout with bus shelter.

As with any roadway project, traffic revisions will take place but advanced notification will be provided. Stay tuned for more information!
